**Subject:** Re: Data - Example Deliverable

Ok. And I talked with HQ. They are in board with the website. Next step is to get me the language we would post. Glad to know they are for it - makes things easier for us.  
Thx

Yes. Thanks. Didn't notice anything curt.

Another question. Can we give an interpretation to this data? I'm thinking we will get asked this question.

We want to post be.c people are clamoring for info and in the "spirit of transparency" we'd like to make it available, but are we in a position to draw any conclusions from that data?

Thx Bonnie.

Hey Joan,

Sorry, my message seems curt.

If you need to explain to HQ -- another important point was that on Monday, the fire looked like it was going to be extinguished and our support would no longer be needed. Extinguishing the fire has taken longer than expected, we've brought in more air monitoring equipment along with ASPECT to support those efforts. We are anticipate OSCs being on-site through the end of this coming week.

Hope that's more helpful.

Thanks, Joan.

I spoke with Mike on Monday after the briefing. He did mention HQ asked about a website. At that point, I didn't think it was needed, we were in a support role, but that might change as the response continues.

We need to share our data and think the website it the way to provide it.

Fran, I am sorry. I didn't realize you wanted to talk about creating a site for Parkersburg. We actually got a call from HQ this week asking if the region was going to develop one, but mike said he bumped into Bonnie, and she didn't think we were interested in doing one, and we got back to HQ saying bec we are in a support mode, the site was not needed.

Ok so when do you want to get this up? Over the weekend? Or on Monday?

I saw what's up on the site; we need to write a paragraph or two that would provide an overview on the front page - similar to what you had included for Minden (of course that had much more history).

I would suggest starting with the statement we used the other day that EPA sent a contractor at 1am Sunday and continued to provide support...etc. then a few sentences about the support we've provided re the air monitoring. And also including the statement about Aspect that got approved by the AA in OPA. (That's how important this is to HQ political appointees).

If you want to include your data below, I would suggest you include some info explaining to people what it is and what they can tell from it.

Once you do that, we need to review it and then contact HQ. They will need to approve.

This is why I'm asking about your time frame bec if you want this up over the w/e, I can try reaching out to HQ to give them a heads up this is coming.

I'm going to wait for your response. Then I'm going to reply generally to your email below and copy Mike to bring him into this conversation. But if you could get started writing that overview, that would be helpful. It isn't that HQ will approve the concept. They will want to see what is going to be posted. If you want to talk, give me a call. 5143. It will roll over to my cell.

Thx Fran.

Fran, I can't open the website on my iPhone. Is this a new website you started for this site?

**Subject:** Data - Example Deliverable

Hi Fran-

Here's an example deliverable for the particulate data. There's a table with the some data summary information at the top, then all the readings and a graph. We can talk more on the call tomorrow but just to give you an idea what I'm thinking.

Thanks-  
Stephanie
